Global power of

Global presence

Aktaş was established in 1938 as Sait Aktaş Rubber and Tire shop and in 1972 started producing the first air springs in Bursa, home of the Turkish automotive industry. After going through an extensive reorganization, the name of the company was changed to Aktaş Air Suspension Systems Company and since then it has been serving its OEM and aftermarket customers worldwide.

Today, Aktaş is a rapidly growing global supplier of high quality air springs and industrial rubber components with 6 strategic locations in 4 continents, reaching a manufacturing capacity of 3 million units. Aktaş has 75% market share in Turkish heavy duty air spring aftermarket and has been certified by ISO TS 16949 since 2002. Its internationally proven quality has also placed Aktaş among the leading European manufacturers. Aktaş increases its global presence by exporting 80% of its products to more than 100 countries around the world. Highly preferred **Airtech** brand has a of more than 1000 different types of air springs which are being manufactured in three plants located in Asia, Europe and Turkey. Airtech can meet any demand and exceed all expectations with its extensive experience, high technology, skilled workforce and commitment to its partners.

Product information

Truck / Trailer

Air springs are widely used on trucks and trailers. They are fitted in the front, rear and tag axle in case of necessity.

Air springs protect load of the vehicle and give comfort to driver by eliminating adverse road conditions.

Bus

In Europe and USA, all buses are fitted with air springs, whereas, in many other countries the usage of air suspension systems is increasing.

Buses benefit the great advantages of air springs to achieve consistently high traveling comfort.

This application generally involves two air springs being fitted to the front axle and four to the rear axle in the buses. Air springs are developed according to technical specifications, such as load capacity and spring deflection.

Rolling lobe air springs

With conical beads

Depending on their weight, they achieve high strokes resulting high comfort without a major change in diameter. This high stroke advantage of conical bead rolling lobe air springs enable the loading/unloading and assembling/disassembling operation easier for these vehicles.

The conical sealing surfaces of these springs make them to be reused when the air springs bellows are replaced.

With clamping beads

Rolling lobe air springs with clamping beads differ from the ones with conical beads by the method of fixing. The fixed connection prevents the air springs to be detached from the plate even under the excessive movement connections.

Rolling lobe air springs with clamping beads are supplied by Airtech as a complete unit with its pistons, plates and the internal bumpers, where necessary assembled as a complete unit.

Traceability

Order numbers starting with **11** are used for **roll** air springs,
 Order numbers starting with **12** are used for **service assembly** air springs,
 Order numbers starting with **13** are used for **complete** air springs,
 Product numbers ending with **P** state these are **service assembly** air springs,
 Product numbers ending with **C** state these are **complete** air springs,
 Product numbers ending with **CPP** state these are **complete plastic piston** air springs,
 Product numbers ending with **C ALU** state these are **complete aluminium** air springs,
 The order number ends with **T** states that these air springs are produced in **Turkey**.

Working conditions

Preventive maintenance

All surfaces including the air spring and the installation area should be free from oil, petroleum and solvents.

Hydraulic and pneumatic line of the air spring supply system should be leakproof.

Air pressure should not exceed 7 bar / 101 psi.

Ambient temperature should be between -40°C to +70°C.
(Only for CR rubber; up to +90°C)

There should be sufficient clearance around the air spring to prevent any contact.

All bolts should be tightened according to the required torque specifications.

Vehicle should be loaded as per manufacturing and technical specifications.

Air springs should be kept clean. Use water and soap for cleaning.

Thinner, lighter and naturally more durable

Our products are developed **for you needs**

We are monitoring our air springs at every stage from production to usage, thanks to the barcode system supported by **TÜBİTAK** .

We produce the pistons with composite materials (reinforced plastics) as well as with metal. The usage of composite materials enables us to produce -not only lighter but also durable air springs.

Your safety **is our concern**

We produce defect free products that always have the high performance, thanks to 25 different tests.

We manufacture air springs that are able to endure up to 21 bars of pressure. We put them under test to ensure that they will not let you down between -40°C and +70°C.

We test our air springs under real road conditions by a simulation machine which is patented by us and supported by **TÜBİTAK**.

We are always **beside you**

Our high quality is also certified by international certification institute ► **DEKRA** and Airtech is the only air spring brand that passes a test of 2,000,000 cycles.

Just tell us the brand of your vehicle. You will definitely find the air spring you are looking for, since Airtech has the widest product range in the world.

We use the optimized, court fabric layers, which provides the extra strength to the air springs and enables rapid heat reduction. We use less raw materials to be environmentally friendly.

Warranty

Our air springs are warranted to be free from defects in material and workmanship.

This 2 years warranty includes any damage caused by environmental conditions, excludes improper installation, accidents, incorrect applications and use in any application other than is specified under original equipment cross references.

No representative or sales agency other than Aktaş itself is authorized to make any additional promise or agreement regarding the warranty of the products that are listed in this catalogue other than what is mentioned above.

In no event shall the manufacturer be liable under this warranty for any incidental or consequential damages including but not limited to loss of freight, loss of profit, equipment or personal downtime.
