Certificazioni Certifications

Importanti costruttori di veicoli ricreativi installano sui propri mezzi di alta gamma, come primo equipaggiamento, le sospensioni pneumatiche integrative TOP DRIVE SYSTEM. Relativamente ad alcuni modelli, TOP DRIVE SYSTEM possiede l'omologazione europea, che ne certifica l'installazione. Le sospensioni pneumatiche integrative TOP DRIVE SYSTEM sono prodotte da ESI Italia S.r.l., azienda certificata ISO 9001 : 2008 per la progettazione e realizzazione di sospensioni pneumatiche ed ammortizzatori oleodinamici, partner di Euroservice S.r.l. La nostra esperienza ci permette di elaborare, realizzare ed omologare soluzioni personalizzate per qualsiasi tipo di veicolo speciale e/o necessità. Numerosi sono i progetti finora portati a termine in questo ambito.

Several major manufacturers of recreational vehicles install TOP DRIVE SYSTEM supplementary pneumatic suspensions as a standard feature on their top range vehicles. For several models, TOP DRIVE SYSTEM supplementary pneumatic suspensions have EU approval, which certifies the installation of these systems. The TOP DRIVE SYSTEM supplementary pneumatic suspensions are made by ESI ITALIA S.r.l., a partner of Euroservice S.r.l. ESI ITALIA has been awarded ISO 9001 : 2008 certification for the design and manufacture of pneumatic suspensions and hydraulic shock absorbers. Based on our experience we can develop, realise and validate customised solution for any type of special vehicle and/or need. Numerous projects for custom systems have in fact already been brought to completion.

Des importants constructeurs de véhicules récréatifs installent sur les véhicules d'haute gamme les suspensions pneumatiques complémentaires TOP DRIVE SYSTEM comme premier équipement. Sur quelques modèles, les suspensions pneumatiques complémentaires TOP DRIVE SYSTEM ont l'homologation européenne qui certifie l'installation de ces équipements. Les suspensions pneumatiques complémentaires TOP DRIVE SYSTEM sont produites par ESI Italia S.r.l., société partenaire de Euroservice s.r.l., certifiée ISO 9001 : 2008 pour le projet et la réalisation de suspensions pneumatiques et amortisseurs oléodynamiques. Grâce à notre expérience, nous pouvons élaborer, réaliser et homologuer des solutions personnalisées pour n'importe quel type de véhicule spécial et/ou n'importe quelle nécessité. En fait, les projets que nous avons réalisés dans ce domaine sont nombreux.

Importantes fabricantes de vehículos de recreo montan, en los vehículos de gama elevada, las suspensiones neumáticas integrales TOP DRIVE SYSTEM como primer equipo. Algunos modelos de suspensiones neumáticas integrales TOP DRIVE SYSTEM poseen la homologación europea que certifica la instalación de estos sistemas. Las suspensiones neumáticas integrales TOP DRIVE SYSTEM están fabricadas por ESI Italia S.r.l., empresa socia de Euroservice s.r.l. y certificada ISO 9001 : 2008 para el diseño y la ejecución de suspensiones neumáticas y amortiguadores oleodinámicos. Gracias a nuestra experiencia podemos elaborar, realizar y homologar soluciones personalizadas para cualquier tipo de vehículo especial y/o necesidad. De hecho muchos son los proyectos que ya hemos realizado en este sentido.

Wichtigen Wohnmobil-Baufirmen installieren die TOP DRIVE SYSTEM Ergänzungsfederungen wie erste Ausrüstung. Für einigen Modelle, die TOP DRIVE SYSTEM Ergänzungsfederungen haben die europäischen Ratifikation, die die Installation der Anlage bescheinigt. Die pneumatische Federungen TOP DRIVE SYSTEM sind bei ESI Italia S.r.l. hergestellt (diese Firma hat Euroservice S.r.l. als Geschäftspartner). Esi Italia S.r.l. ist ISO 9001 : 2008 bescheinigt für die Planung und die Ausführung der pneumatischen Federungen und die Ölstoßfänger. Dank unserer Erfahrung können wir persönliche Auflösungen für verschiedene Sonderfahrzeuge alles Typen, erarbeiten, realisieren und ratifizieren. Die Pläne in diesem Bereich sind zahlreich.

Generale. Le presenti condizioni generali di vendita regolano il rapporto contrattuale nascente tra le parti a seguito dell'accettazione da parte di ESI Italia s.r.l. dell'ordine di acquisto del Cliente, salvo accordi diversi eventualmente concordati per iscritto e con espresso riferimento alle presenti condizioni generali di vendita derogandone il contenuto, su carta intestata di ESI Italia s.r.l., debitamente sottoscritto da un legale rappresentante della stessa. Tutte le descrizioni ed illustrazioni contenute nel catalogo on-line, o in altra documentazione commerciale fornita da ESI Italia s.r.l., hanno il solo scopo di fornire al Cliente un'idea generale dei prodotti e non costituiranno parte del contratto tra le parti.

Prezzi. Tutti i prezzi indicati sono da intendersi IVA esclusa, salvo specifiche differenti. I prezzi riportati nel catalogo e sul sito internet possono subire variazioni legate al costo delle materie prime. Qualora il prezzo del prodotto ordinato risulti differente da quello indicato dal Cliente nel modulo d'ordine, ESI Italia s.r.l. provvederà a darne tempestiva comunicazione al Cliente stesso, il quale avrà facoltà di confermare o annullare l'ordine. Per ordini particolari relativi a prodotti non presenti nel catalogo ESI Italia s.r.l. o per cui il prezzo non è riportato, questo dovrà essere concordato in fase di ordine e confermato per iscritto da parte di ESI Italia s.r.l.. Il prezzo del prodotto potrà inoltre essere incrementato delle spese di trasporto dal fornitore verso ESI Italia s.r.l.

Ricezione dell'ordine. La corretta ricezione dell'ordine viene confermata da ESI Italia s.r.l. mediante risposta via e-mail, inviata all'indirizzo di posta elettronica indicato dal Cliente. Tale messaggio di conferma ricapiterà tutti i dati inseriti dal Cliente, che si impegna a verificarne la correttezza e a comunicare tempestivamente eventuali anomalie e relative correzioni. Verificata la disponibilità del bene e l'esattezza dei dati del Cliente, ESI Italia s.r.l. invierà tramite e-mail l'accettazione del contratto (conferma dell'ordine) in cui viene indicata la data di consegna prevista. Effettuando l'ordine tramite il sito internet, il Cliente dichiara di aver preso visione delle condizioni di vendita, delle modalità di pagamento proposte e di tutta la procedura di acquisto.

Consegna. La consegna dei prodotti sarà effettuata alle condizioni di trasporto e di costo concordate con il Cliente in fase di ordine del materiale. La spedizione in giornata, quando possibile, sarà effettuata, di regola, solo per le ordinazioni pervenute entro le ore 12.30. Resta comunque inteso che i termini di consegna devono intendersi come non inderogabili in quanto soggetti a fattori esterni di cui ESI Italia s.r.l. non può essere ritenuta responsabile. Qualora il costo di trasporto risulti superiore rispetto a quanto concordato in fase di ordine, ESI Italia s.r.l. provvederà a darne tempestiva comunicazione al Cliente prima della spedizione, che avrà luogo esclusivamente dopo l'accettazione del nuovo importo da parte del Cliente stesso entro 3 (tre) giorni dalla sua comunicazione. Qualora ESI Italia s.r.l. preveda di non essere in grado di rispettare i termini di consegna indicati, provvederà a dare comunicazione delle nuove condizioni di consegna del prodotto al Cliente, che dovrà confermare l'ordine rivisto entro 3 (tre) giorni dalla comunicazione delle variazioni da parte di ESI Italia s.r.l.. Nel caso in cui il Cliente intenda ritirare i prodotti direttamente presso la sede di ESI Italia s.r.l. – Strada Fornacino, 152 – 10040 – Leini (TO), dovrà farne specifica richiesta in fase di ordinazione.

Pagamenti. Le modalità di pagamento vengono concordate con ESI Italia s.r.l. e possono avvenire:

- mediante ricevuta bancaria;
- mediante bonifico bancario;
- mediante contrassegno.

Qualsiasi condizione di pagamento diversa da quelle di cui sopra, dovrà essere concordata per iscritto con ESI Italia s.r.l. prima dell'effettuazione dell'ordine. In caso di mancato pagamento dell'importo dovuto dal cliente, il contratto di vendita si intenderà senz'altro risolto di diritto ai sensi e per gli effetti di cui all'articolo 1456 del codice civile.

Trascorsi 6 mesi o più dalla data dell'ultimo acquisto, verrà automaticamente variata la modalità di pagamento in contrassegno.

Diritto di recesso. Ai sensi dell'art. 64 D.Lgs. N. 209/2005, il consumatore (ossia una persona fisica che non effettua l'acquisto indicando nel modulo d'ordine un riferimento di Partita IVA) ha diritto di recedere al contratto di acquisto per qualsiasi motivo, senza alcuna penalità, fatto salvo quanto di seguito indicato. Per esercitare tale diritto, entro 10 giorni dalla ricezione della merce, il Cliente dovrà inviare tramite raccomandata con avviso di ricevimento una richiesta di recesso nella quale sarà necessario indicare i motivi del recesso, le coordinate bancarie necessarie per restituire le somme corrisposte, la fotocopia della fattura di vendita. La richiesta andrà spedita a: ESI Italia s.r.l. - Strada Fornacino, 152 - 10040 Leini (TO). Ricevuta la raccomandata, ESI Italia s.r.l. provvederà ad inviare via email al Cliente il modulo di esercizio del diritto di recesso provvisto del numero di autorizzazione al rientro del materiale, che dovrà essere apposto all'esterno dell'imballo con cui verrà restituito il prodotto al venditore. La merce dovrà essere fatta pervenire ad ESI Italia s.r.l. entro 10 giorni dalla data dell'autorizzazione. Il diritto di recesso è sottoposto alle seguenti inderogabili condizioni:

- il diritto si applica al prodotto acquistato nella sua interezza, non è possibile esercitare il recesso solamente su parte del prodotto acquistato (es.: accessori, allegati, ecc...);
- il diritto non viene applicato sulla merce rispedita ad ESI Italia s.r.l. senza specifica autorizzazione rilasciata dalla società stessa;
- il bene acquistato dovrà essere integro e completo in tutte le sue parti (compresa eventuale documentazione e dotazione accessoria: manuali, minuteria, ecc...);
- il bene soggetto a esercizio del diritto di recesso deve riportare lo stesso numero di matricola presente in fattura di vendita. Qualora il bene dovesse riportare un numero di matricola diverso da quanto segnalato in fattura, il reso non verrà accettato, la richiesta di recesso verrà annullata ed il prodotto sarà messo a disposizione del Cliente per la sua restituzione;
- la spedizione relativa alla restituzione del bene, fino all'attestato di avvenuto ricevimento nel magazzino di ESI Italia s.r.l., è a cura, spese e rischio del Cliente;
- in caso di danneggiamento del bene durante il trasporto, ESI Italia s.r.l. darà comunicazione al Cliente dell'accaduto entro 5 giorni lavorativi dal ricevimento della merce nei propri magazzini. Questo dovrà sporgere tempestivamente denuncia nei confronti del corriere da lui scelto per ottenere il rimborso del valore del bene (se assicurato); in questa eventualità, il prodotto sarà messo a disposizione del Cliente per la sua restituzione e verrà contemporaneamente annullata la richiesta di recesso;
- ESI Italia s.r.l. Non risponde in alcun modo per danneggiamenti o furto/smarrimento di beni restituiti con spedizioni non assicurate;
- ESI Italia s.r.l. provvederà ad applicare un contributo fisso per le spese di gestione del reso pari ad Euro 15,00 (quindici), anche se la confezione originale del prodotto risultasse intatta.

Fatte salve eventuali spese di ripristino per danni accertati al prodotto, il venditore, entro 30 giorni dal rientro della merce, provvederà a rimborsare al Cliente l'intero importo pagato, al netto delle spese di gestione della pratica, tramite bonifico bancario. Il diritto di recesso decade totalmente nei casi in cui ESI Italia s.r.l. accerti:

- la mancata apposizione sull'involucro esterno della confezione spedita del modulo di autorizzazione al rientro della merce rilasciato dal venditore;
- l'assenza di alcuni componenti costituenti il prodotto (accessori, cavi, manuali, minuterie, ecc.) o anomalie al prodotto stesso;
- il danneggiamento del prodotto per cause diverse dal suo trasporto.

Nel caso di decadenza del diritto di recesso, ESI Italia s.r.l. provvederà a restituire al Cliente il bene acquistato, addebitando allo stesso le spese di spedizione.

Garanzia. Qualora, nonostante un corretto e responsabile utilizzo da parte del Cliente, vengano riscontrate delle difettosità sui prodotti forniti, ESI Italia s.r.l. provvederà, a sua discrezione sulla base della natura e dell'entità del difetto riscontrato, alla loro sostituzione, riparazione o al rimborso del relativo prezzo (al netto delle spese di gestione della pratica), a condizione che la segnalazione avvenga entro e non oltre 12 (dodici) mesi dalla data di acquisto. I prodotti, o le parti di essi cui la contestazione si riferisce, dovranno essere restituiti a ESI Italia s.r.l. con spedizione a cura del Cliente secondo le modalità descritte nel precedente paragrafo. I prodotti, o le parti di essi, resi dovranno essere accompagnati da una nota riportante la descrizione della difettosità riscontrata. Laddove la problematica segnalata non fosse imputabile ad un difetto di produzione, bensì ad un non corretto ed irresponsabile utilizzo del prodotto da parte del Cliente, ESI Italia s.r.l. provvederà ad applicare un contributo fisso per le spese di gestione del reso pari ad Euro 15,00 (quindici).

General. These general conditions of sale govern the contractual relationship emerging between the parties following the acceptance by ESI Italia srl of the customer's purchase, unless otherwise arranged as may be agreed in writing and with express reference to the general conditions of sale by derogating the content, on letterhead of ESI Italia srl, duly signed by a legal representative of the same. All descriptions and illustrations contained in the on-line catalogue or in any other commercial documentation provided by ESI Italia srl are only intended to provide the customer with a general idea of the products and will not constitute part of the contract between the parties.

Prices. All prices quoted are exclusive of VAT, except if otherwise specified. The prices listed in the catalogue and on the website are subject to variation according to the cost of raw materials. If the price of the product ordered proves different from that indicated by the customer in the order form, ESI Italia srl will promptly notify the customer, who then has the right to confirm or cancel the order. For special orders for products not listed in the catalogue of ESI Italia srl or for which the price is not shown, the price must be agreed at time of order and confirmed in writing by ESI Italia srl. The product price may also be increased by transport costs set by the suppliers of ESI Italia srl.

Receipt of order. Correct receipt and acceptance of order is confirmed by ESI Italia srl by an e-mail reply sent to the email address provided by the customer. This confirmation message will summarise all the data entered by the customer, who in turn agrees to verify the correctness and communicate any discrepancies and relevant corrections. Once the availability of goods and the accuracy of customer data have been checked, ESI Italia srl will send by e-mail a contract acceptance (order confirmation) that indicates the expected delivery date. By placing an order through the website, you represent that you have read the conditions of sale, the proposed payment methods and the description of the sale process.

Delivery. Product delivery will be made under the conditions of transport and cost agreed with the customer during the order of the material. Same-day shipment, as a rule and when possible, will be made only for orders received by 12:30pm. In any case, we emphasise that the terms of delivery shall be understood as indicative and not mandatory, as they are subject to external factors for which ESI Italia srl cannot be held responsible. If the shipping cost is higher than agreed in the order, ESI Italia srl will promptly notify the customer before shipping. In this case, the product will be shipped only after the customer accepts the new amount within 3 (three) days of notification. If ESI Italia srl expects that it won't be able to meet the delivery times indicated, the company will give notice of the new terms of delivery of the product to the customer, who then must confirm the revised order within 3 (three) days of notification of the changes by ESI Italia srl. In the event that the customer wishes to collect the products directly at the headquarters of ESI Italia srl - Strada Fornacino, 152-10040 - Leini (TO), the customer will have to make a specific request when ordering.

Payments. Payment methods must be agreed with ESI Italia srl and can be as follows:

- a) by bank receipt;
- b) by bank transfer;
- c) by cash on delivery.

Any condition of payment other than those mentioned above must be agreed in writing with ESI Italia srl before the order. In case of non-payment of the amount due from the customer, the sales contract shall be considered definitely terminated in accordance with and for the purposes of Article 1456 of the Italian Civil Code. Passed 6 months from the date of the last purchase, payment method will be automatically changed in "cash on delivery".

Right of withdrawal. Under Article 64 of the Legislative Decree no. 209/2005, the consumer (i.e. a person who makes the purchase by indicating in the order form a reference to VAT) has the right to rescind the purchase contract for any reason, without penalty, subject to the following. To exercise this right, within 10 days of receipt of goods, the customer must send, by registered mail with a return receipt, a request for withdrawal specifying in it the reasons for withdrawal, bank details for the refund, and a photocopy of the sale invoice. The request shall be sent to: ESI Italia srl - Strada Fornacino, 152 - 10040 Leini (TO). Upon receiving the letter, ESI Italia srl will e-mail the customer a withdrawal form along with the authorisation number for the return of goods, which must be affixed to the shipping packaging in which the product will be returned to the seller. The goods must be made to arrive at ESI Italia srl within 10 days from the date of authorisation. The right of withdrawal is subject to the following conditions:

- The law applies to a product purchased in its entirety, it is not possible to exercise such right only on parts of the product purchased (eg: accessories, attachments, etc.);
- The law does not apply to merchandise returned to ESI Italia srl without specific authorisation issued by the company;
- The product must be whole and complete in all its parts (including any documentation and accessories: manuals, hardware, etc.);
- The property subject to the right of withdrawal must bear the same serial number as indicated in its sale invoice. If returned property bears a serial number different from that reported in the sale invoice, the return will not be accepted, the request for withdrawal will be cancelled and the product will be made available to the customer for its return;
- Shipment costs for the return of property, until the certificate of receipt in the warehouse of ESI Italia srl, is at the expense and risk of the customer;
- If the goods are damaged during transport, ESI Italia srl will notify the customer within 5 working days from receipt of goods at their warehouse. In such case, the customer will have to file a timely complaint against the carrier of his choice to get the refund of the value of the property (if insured); in this case, the product will be made available to the customer for its return and the request for withdrawal will be simultaneously cancelled;
- ESI Italia srl is not responsible in any way for damage or theft/loss of goods returned by uninsured shipments;
- ESI Italia srl will apply a fixed contribution to the costs of returns management, in the amount of €15.00 (fifteen), even if the original packaging of the product proves to be intact.

Without prejudice to any repair costs for damage to the product, the seller, within 30 days of the return of goods, will refund the customer the full amount paid, net of the returns management expense, by bank transfer. The right of withdrawal is lost in cases where ESI Italia srl finds:

- failure to affix on the outside of the shipping package the authorisation form for the return of goods, as issued by the seller;
- absence of some of the components of the product (accessories, cables, manuals, small parts, etc.), or defect to the product itself;
- damage to the product for reasons other than transportation.

In case of forfeiture of the right of withdrawal, ESI Italia srl will return the purchased property to the customer, charging the same shipping costs.

Warranty. If, despite a correct and responsible use by the customer, the latter finds defects in products supplied, ESI Italia srl will, at its discretion and based on the nature and extent of the defects, provide their replacement, repair or refund of their price (net of returns management expense), provided that said defects are reported no later than 12 (twelve) months from the date of purchase. The products, or parts thereof relevant to the dispute, must be returned to ESI Italia srl, shipped by the customer as described in the previous paragraph. The returned products or parts thereof must be accompanied by a note giving a description of the defects found. Should the reported problem be due not to a manufacturing defect but to an incorrect and irresponsible use of the product by the customer, ESI Italia srl will apply a fixed fee for returns managements, in the amount of €15.00 (fifteen).

Introduzione

Introduction

Il sistema TOP DRIVE SYSTEM viene sviluppato nel 1991 basandosi sull' applicazione di molle ad aria aggiuntive a veicoli da trasporto, riscuotendo immediato successo.

La gamma conta circa 200 differenti modelli e oltre 500 versioni che spaziano dai mezzi da trasporto leggeri ai veicoli industriali di massima portata. Il catalogo TOP DRIVE SYSTEM è pertanto il più completo d'Europa per copertura di veicoli.

Ad oggi si contano più di 100.000 installazioni in Europa e nel mondo.

Progetti speciali (fuori catalogo) per applicazioni particolari quali fuoristrada, veicoli da cantiere, veicoli industriali per trasporto container e casse mobili, vengono inoltre realizzati su richiesta.

Le molle ad aria integrative sono particolarmente indicate per i veicoli che trascorrono buona parte della loro vita in condizioni di carico prossime al limite indicato dal costruttore.

In tal caso l'adozione delle molle ad aria riduce notevolmente il rollio e l'usura delle balestre e dei componenti collegati.

Il beneficio è immediatamente percepibile: il rollio è significativamente ridotto, il miglioramento dell'assetto del veicolo è immediata, il conducente sente il veicolo sotto il proprio controllo.

I tradizionali rinforzi alle balestre (fogli aggiuntivi, inserimento del balestrino) sono destinati a durare limitatamente nel tempo non apportando i benefici tipici delle molle ad aria.

Il principale vantaggio di TOP DRIVE SYSTEM è la regolazione in funzione del mezzo e/o del carico. Inoltre l'assorbimento delle asperità è completamente diverso per la molla ad aria rispetto alla metallica.

In prossimità dell'intervento del tampone fine corsa, il veicolo è ancora in grado di reagire con continuità e senza gli urti dello stesso sull'assale, aumentando quindi la vita degli organi importanti del veicolo.

Il sistema TOP DRIVE SYSTEM è disponibile per assali posteriori e anteriori e viene fornito in kit per i modelli più diffusi di veicoli commerciali ed industriali prodotti dalle maggiori case automobilistiche europee.

Tutti i kit "TOP DRIVE SYSTEM" vengono forniti con doppie valvole di controllo "TOP DRIVE CONTROL" che ne limitano la pressione massima di esercizio, già preassemblati e collaudati per la tenuta dell'aria.

Lo sdoppiamento dell'impianto pneumatico consente di gonfiare a pressioni diverse i due lati permettendo, in parte, il livellamento del veicolo dovuto ad asimmetrie di carico.

L'installazione è estremamente semplificata, nella maggior parte dei casi non è necessario praticare alcun foro sul telaio del veicolo, né effettuare saldature o operazioni che richiedano attrezzature particolari, rendendo semplice anche l'eventuale rimozione.

Importanti costruttori di veicoli ricreativi installano sui veicoli di alta gamma le sospensioni pneumatiche integrative "TOP DRIVE SYSTEM" come primo equipaggiamento.

VANTAGGI

Grazie al sistema "TOP DRIVE SYSTEM" si ottengono numerosi vantaggi, quali ad esempio:

- maggiore elasticità di carico
- maggiore silenziosità e comfort di marcia
- maggiore stabilità e tenuta di strada (minor rollio)
- ottima affidabilità
- semplice installazione
- scarsa manutenzione
- diminuzione delle sollecitazioni dirette alle strutture di base del veicolo
- evita l'abbassamento del retrotreno dovuto all'affaticamento delle balestre
- consente il livellamento del veicolo
- assicura il corretto assetto dei proiettori anteriori
- migliora la stabilità del carico durante la marcia
- migliora la distribuzione delle masse del veicolo sugli assali migliorando le manovre di sterzata

APPLICAZIONI

Le applicazioni possibili sono numerosissime ad esempio:

- ambulanze
- minibus
- mezzi antincendio
- veicoli di soccorso stradale
- veicoli per trasporto disabili
- trasporto di merci delicate
- veicoli speciali
- veicoli ricreativi (motocaravans)
- uffici e officine mobili
- automezzi per trasporti speciali

TOP DRIVE SYSTEM

Introduction

The TOP DRIVE SYSTEM has been developed in 1991 based on additional air spring application at transport vehicles, gaining immediate success. Application count about 200 models and over 500 versions which ranges from lightweight to heavy transport vehicles. The TOP DRIVE SYSTEM catalogue is therefore the most complete in Europe for vehicle coverage.

Today over 100.000 installations has been made in Europe and in the world.

The integrative air springs are especially indicated for vehicles which spend several time of their life in loaded conditions near the constructor's indicated limit. In this situation, air springs application significantly decrease the induced rolling moment, avoid leaf spring weakening and the wearing of relative connected parts. Benefit is immediate and perceptible: the induced rolling moment is significantly reduced, vehicle stability improvement is immediate, the driver feels the control of his vehicle.

The traditional leaf spring reinforcement (additional or supplementary leafs) is bound to have a short life span and not improve the vehicle like the air springs do.

TOP DRIVE SYSTEM main advantage is his regulation ability, according to vehicle type and load.

The performance in vibration absorption on bumpy roads is completely different between an air spring and a metallic coil spring.

Even at the minimum space between the end stroke rubber pad and the axle, the vehicle is still able to react without bumps, holding safely all vehicle parts.

TOP DRIVE SYSTEM is available for front and rear axles and is provided in kit for the most diffuse European commercial and industrial vehicles.

Each TOP DRIVE SYSTEM kit is provided with twin "TOP DRIVE CONTROL" valve, which limit the maximum working pressure, already preassembled and airtight tested.

Pneumatic system splitting allows different inflating pressure for each side and the leveling in unbalanced load situations.

Installation is really simple, in most cases is not necessary any supplementary hole on chassis, no welding and other particular tools operations, allowing an easy removal process too.

Major recreational vehicles manufacturers install TOP DRIVE SYSTEM integrative air suspensions as first equipment.

ADVANTAGES

The "TOP DRIVE SYSTEM" offers numerous advantages, such as:

- greater load elasticity
- less noise and greater driving comfort
- greater stability and a better road-holding capacity (less rolling)
- excellent reliability
- simple installation
- few maintenance requirements
- decrease in direct stresses on basic vehicle structures
- prevents lowering of the rear axle due to leaf spring fatigue
- allows vehicle levelling
- ensures correct positioning of the headlamps
- enhances load stability during travel
- allows a better distribution of weight on the different vehicle axes, thereby improving steering manoeuvres

APPLICATIONS

It has a wide range of possible applications, e.g.:

- ambulances
- minibuses
- fire trucks
- roadside rescue and recovery vehicles
- vehicles for transporting the disabled
- transport of fragile merchandise
- special vehicles
- recreational vehicles (motor caravans)
- mobile offices and workshops
- special transport vehicles

Viene qui descritta, in modo molto sommario, la composizione tipica delle sospensioni pneumatiche integrative TOP DRIVE SYSTEM, al fine di agevolare la lettura del catalogo e delle istruzioni contenute nelle confezioni.

Il kit di sospensioni pneumatiche integrative comprende tutto il necessario per la realizzazione dell' impianto. In particolare sono presenti le molle ad aria preassemblate e tutti i tubi e raccordi pneumatici necessari per la realizzazione dell' impianto che in ogni caso sarà diviso nelle due sezioni destra e sinistra (con gonfiaggio e relativa gestione autonoma).

In particolare la molla ad aria è composta da :

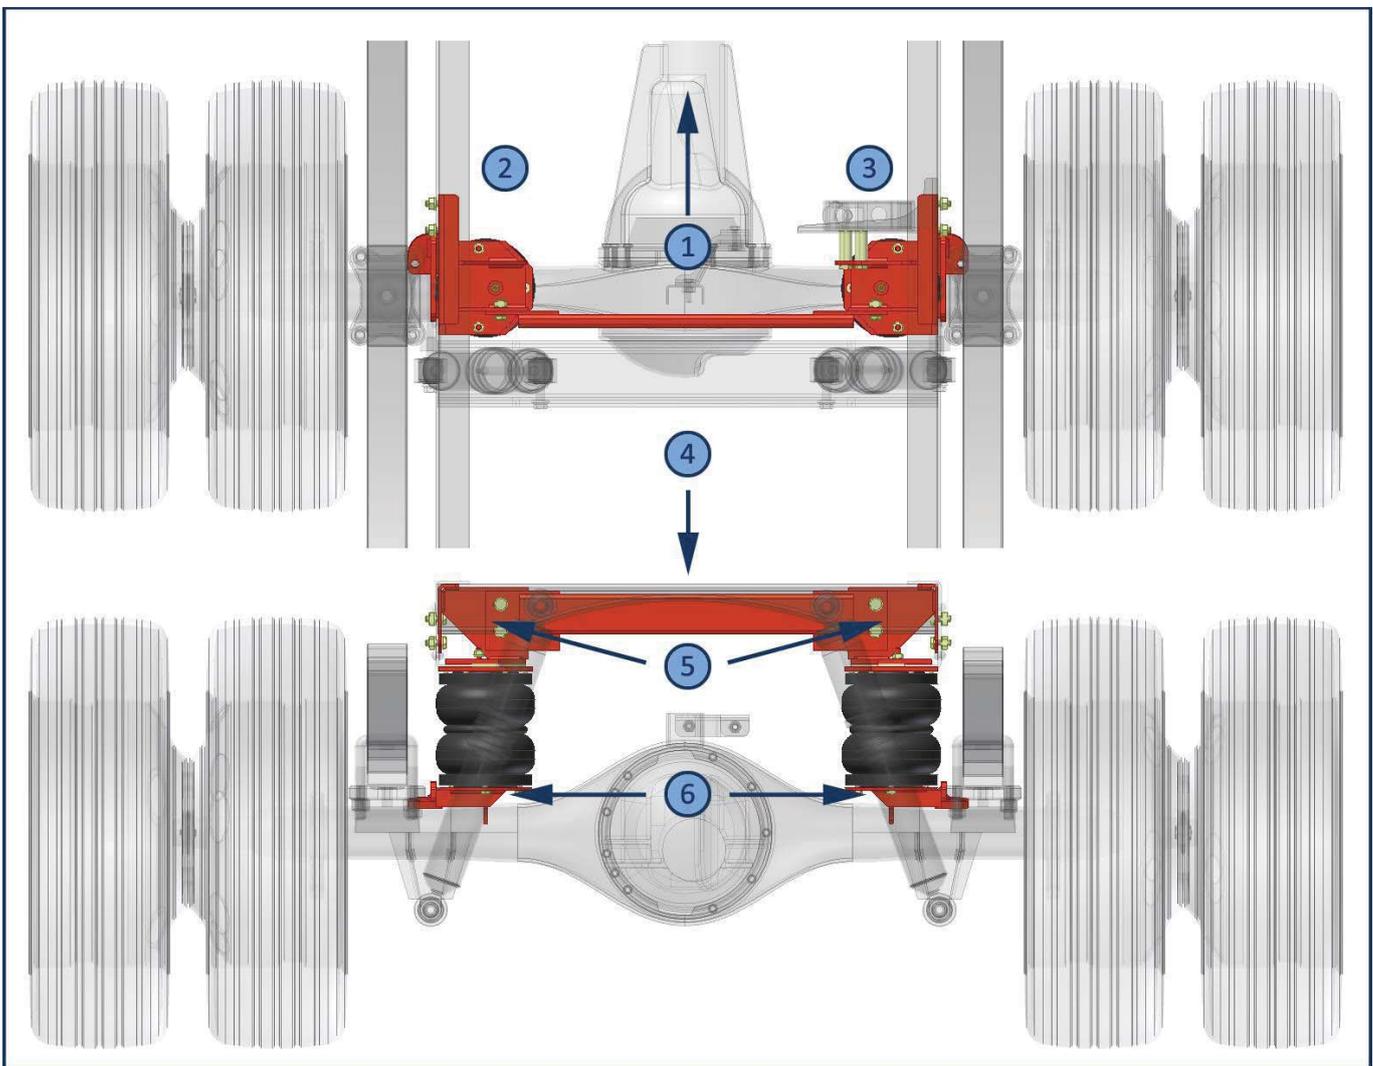

- Gruppo attacco superiore, normalmente vincolato al telaio;
- Gruppo attacco inferiore, normalmente vincolato all' assale;
- Torpress o Diapress, è la camera d' aria in gomma a doppia telatura che costituisce il cuore del sistema

Below is showed a brief TOP DRIVE SYSTEM description useful to better understand the system or to ease the reading of the catalogue.

In the kit there is all the necessary for the system realization, in particular the two pre-assembled air springs (left and right side), tubes and connectors.

The air spring components are:

- Upper locking group, normally chassis constrained
- Lower locking group, normally axle constrained
- Torpress or diapress (the rubber air spring, double rubberised canvas) the heart of the system

1. Senso di marcia - 2. Lato sinistro - 3. Lato destro - 4. Traversa di accoppiamento (se presente) - 5. Gruppi attacco superiori - 6. Gruppi attacco inferiori
1. Driving way - 2. Left side - 3. Right side - 4. Crossbar (if needed) - 5. Upper locking system - 6. Lower locking system

Ogni kit di sospensioni pneumatiche TOP DRIVE SYSTEM è fornito di istruzioni particolareggiate e personalizzate per l'installazione e l'utilizzo. Il montaggio non comporta interventi che compromettano l'integrità del veicolo. Le sospensioni pneumatiche possono essere rimosse in qualunque momento, ripristinando il veicolo al suo stato originale. In basso è riportato un esempio delle istruzioni che vengono incluse in ogni kit TOP DRIVE SYSTEM.

Each TOP DRIVE SYSTEM air suspension kit is supplied with custom detailed installation and utilization instructions. The installation never compromises vehicle integrity. The air suspensions can be removed at any times, restoring the vehicle at his original status. Below there is an example of provided installation instructions included in every TOP DRIVE SYSTEM kit.

ISTRUZIONI DI MONTAGGIO / INSTALLATION INSTRUCTIONS

CONTENUTO DELLA CONFEZIONE / PACKAGE CONTENT

Sospensione destra / Right suspension (1x)
Sospensione sinistra / Left suspension (1x)

Clips kit Composed by:
• Plastic clips (20x)

Istruzioni impianto pneumatico (1x)
Pneumatic system instruction (1x)

1

Posizionare il veicolo in modo da operare in **sicurezza** e comodità.

Place the vehicle in a hole or bridge, to operate **SAFE** and comfortably.

2

Allentare il pacco balestre, rimuovere il tampone fine corsa per poi consegnarlo all'utente finale.

Loosen the leaf spring pack, remove rebound pad and give later to the end user.

3

Smontare momentaneamente le piastre di ancoraggio a telaio pre-assemblate sulle sospensioni svitando i dadi di fissaggio M8, per facilitare l'installazione.

Momentarily take apart the pre-assembled chassis locking plates from suspensions by unscrewing the M8 locking nuts, to easy the installation.

4

Innestare e fissare il tubo RILSAN dell'impianto pneumatico :

- Tubo rosso per il lato destro
- Tubo nero per il lato sinistro

Fit RILSAN pipe on pipe fitting:

- Red for right side
- Black for left side.

5

Posizionare la sospensione tra l'asse e il telaio, al posto del tampone fine corsa rimosso e serrare nuovamente il pacco balestre.

Place suspension between axle and chassis, in place of rebound pad previously removed and lock again the leaf spring pack.

6

Calzare le piastre di ancoraggio a telaio sulla sospensione, come mostrato in figura, non serrare completamente i dadi di bloccaggio.

Place the chassis locking plates on suspension, as shown in picture, do not tighten the nuts yet.

7

Dettaglio del posizionamento delle piastre di fissaggio a telaio

Chassis locking plates positioning detail view.

8

Inserire la vite M8x100 nel foro passante presente nel telaio, come mostrato in figura, utilizzare i dadi e le rondelle per il bloccaggio. Serrare le piastre di ancoraggio alla sospensione stringendo i dadi.

Place provided M8x100 screws in chassis through hole, use washers and nuts to lock. Lock the chassis locking plates at suspension by tightening the nuts.

9

Sospensione installata correttamente. Ripetere le operazioni da 1 a 8 per il lato sinistro del veicolo.

Suspension correctly installed. Repeat from 1 to 8 for the left side of vehicle.

10

Posizionare l'etichetta delle pressioni di lavoro in cabina in un luogo ben visibile al conducente; posizionare l'etichetta di identificazione prodotto sul fianco interno della portiera lato guida.

N.B. - per l'esecuzione dell'impianto pneumatico attenersi alle istruzioni specifiche non incluse in questo manuale.

Put the work pressure stick in a place visible for the driver, in the cabin; place the product identification sticker on the driver's vehicle door internal side.

NOTE: for the execution of pneumatic system, follow specific instructions not included in this manual. See the "pneumatic system installation instructions" form face picture right.

11

ATTENZIONE: per la realizzazione dell'impianto pneumatico, attenersi alle istruzioni specifiche. Solo impianto inflati può variare a seconda della versione scelta (manuale, autoventilante o elettrico) pertanto le istruzioni per l'impianto pneumatico sono riportate nell'apposito libretto allegato al kit acquistato in ogni caso serrare i dadi della raccorderia con moderazione, avendo cura di non rimuovere il raccordo nella parte già fissata. Nel caso questo avvenga, rimuovere completamente il raccordo, effettuare un'accurata pulizia e fissare nuovamente il raccordo con sigillante da noi consigliato (sigilla filati, COD: 188500 oppure S.5000).

IMPORTANT: NON utilizzare teflon liquido, canapa, vernici ecc... In caso di problemi e/o informazioni, contattare il nostro ufficio tecnico.

WARNING: For the execution of the pneumatic system, please strictly refer the specific given instructions. In fact, the system may vary according to the chosen version (manual, self venting or electric), so that the instructions for the pneumatic system are stated in the apposite handbook enclosed at the purchased kit.

IMPORTANT: do NOT use liquid Teflon®, hemp, paints etc... In case of problem and/or information, contact our technical office. In case you fail to comply with all these indications, societies EUROSERVICE S.r.l. and ESI Italia S.r.l. aren't responsible for eventually damages derivates. For further information contact us.

KIT di gonfiaggio, compressori aria, accessori e ricambi per sospensioni pneumatiche integrative

Inflating KIT, air compressors, accessories and spare parts for integrative pneumatic suspensions

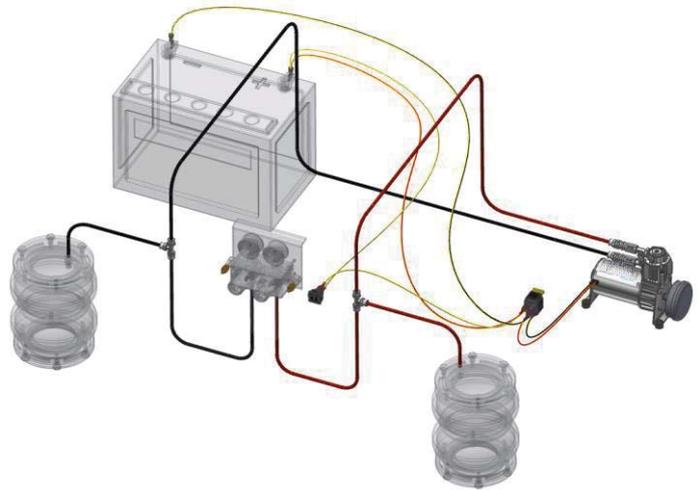

Top Drive System Ref. : **Sostituisce / Replace:**
89700290 -12V **583204**

Kit Gonfiaggio Manuale con compressore 12V DC - Applicazione interna -

Permette il gonfiaggio di entrambe le sospensioni alla pressione ritenuta necessaria dall' utilizzatore e lo sgonfiaggio manuale indipendente (destra e sinistra).Indicato per veicoli con carico costante e/o variabile come camper, officine mobili, veicoli cassonati o furgonati per consegne a breve e lungo raggio.

Manual inflating 12 V DC Air Compressor Kit - Internal installation -
It allows custom inflating pressure on both suspensions and differentiated deflating (left and right) too.Recommended for constant loaded vehicles like camping cars, mobile service vehicles, etc.. And for variable loaded vehicles like flatbed trucks, vans, etc.. For short and long distance deliveries.

KIT applicabile su tutte le sospensioni TOP DRIVE SYSTEM (anche già installate) e su sistemi di sospensioni di altri produttori.

KIT suitable for all TOP DRIVE SYSTEM suspensions (already installed too) and for other manufacturers suspensions systems.

E' sconsigliato un utilizzo diverso da quello indicato.
Every other employment is not advisable.

Compressore aria modello: 583203
Air compressor model:

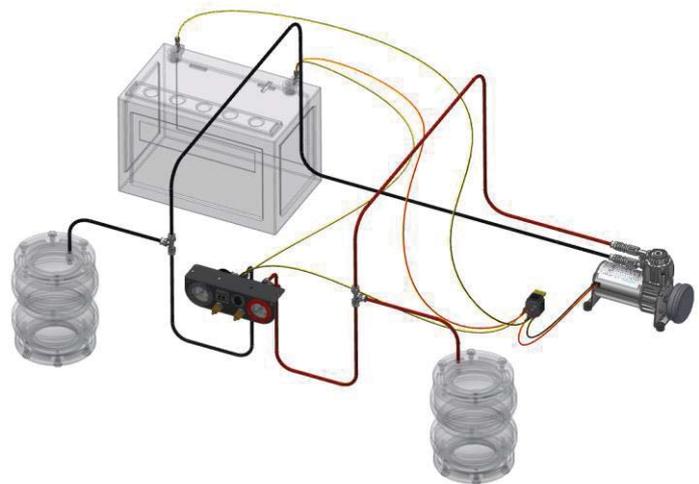

Top Drive System Ref. : **Sostituisce / Replace:**
89700291 -12V **583420**

Kit Compressore 12V DC con pannello di controllo a cruscotto

Permette il gonfiaggio di entrambe le sospensioni alla pressione ritenuta necessaria dall' utilizzatore e lo sgonfiaggio manuale indipendente (destra e sinistra).Indicato per veicoli con carico costante e/o variabile come camper, officine mobili, veicoli cassonati o furgonati per consegne a breve e lungo raggio.

12V DC compressor kit with dashboard control panel
It allows custom inflating pressure on both suspensions and differentiated deflating (left and right) too.Recommended for constant loaded vehicles like camping cars, mobile service vehicles, etc.. And for variable loaded vehicles like flatbed trucks, vans, etc.. For short and long distance deliveries.

KIT applicabile su tutte le sospensioni TOP DRIVE SYSTEM (anche già installate) e su sistemi di sospensioni di altri produttori.

KIT suitable for all TOP DRIVE SYSTEM suspensions (already installed too) and for other manufacturers suspensions systems.

Air compressor model:

Top Drive System Ref. : **Sostituisce / Replace:**
89700210 -12V **583303**

Kit Gonfiaggio Manuale con compressore 12V DC sgonfiaggio indipendente

Kit compressore a 2 canali con scarico automatico della testa e sgonfiaggio indipendente sui due canali.

Manual inflating 12 V DC Air Compressor Kit independent deflating
Air compressor kit with automatic head release and independent deflate on which channel.

Applicabile su tutti i kit di sospensione TOP DRIVE SYSTEM e su tutte le utenze pneumatiche che necessitino il gonfiaggio comune e lo sgonfiaggio differenziato.

Suitable for all LCV TOP DRIVE SYSTEM air suspensions kit and pneumatic devices that need common inflating and differentiated deflating.

E' sconsigliato un utilizzo diverso da quello indicato.
Every other employment is not advisable.

Compressore aria modello: 583207
Air compressor model:

Top Drive System Ref. :

89700200 -12V

Compressore 12V preassemblato multiuso con serbatoio pressostato e valvola limitazione pressione

Consente di alimentare una piccola utenza generica a pressione massima controllata. Il sistema funziona automaticamente con pressostato differenziale con 2 bar di isteresi.

Pre assembled 12V multi purpose compressor with reservoir, pressure switch, pressure limiter valve.

Allow to feed a generic small air device at controlled pressure. This system works automatically with automatic 2 bar of hysteresis pressure switch.

Kit applicabile ad ogni tipo di utenza pneumatica richiedente piccole quantità d'aria.

Suitable for small pneumatic devices.

E' sconsigliato un utilizzo diverso da quello indicato.

Every other employment is not advisable.

Compressore aria modello:
Air compressor model:

583203

Top Drive System Ref. : **Sostituisce / Replace:**
89700301 -12V **583301**

583322 - 24V Rinforzato / Reinforced

Kit Gonfiaggio Automatico con sistema VUOTO-CARICO a scarico parziale o totale con compressore e pressostato a bulbo. -

Applicazione interna -

Permette di mantenere, automaticamente, la pressione delle sospensioni prestabilita, tramite le valvole di regolazione TOP DRIVE CONTROL (anche differenziata destra - sinistra).E' particolarmente indicato per veicoli con un carico variabile e costante come veicoli commerciali cassonati o furgonati per consegne a breve e lungo raggio e Camper. Permette inoltre lo sgonfiaggio totale e parziale delle sospensioni simultaneamente tramite interruttore in cabina.

Automatic inflating and EMPTY-LOADED system with partial or total deflating and Air Compressor Kit with bulb pressure switch. - Internal installation -

It allows to maintain predetermined pressure set by TOP DRIVE SYSTEM regulation valves automatically (Even in differentiated regulation between left and right).Especially recommended for constant and variable loaded vehicles like flatbed trucks, vans, etc.. For short and long distance deliveries and Camper. Permits simultaneous partial or total suspensions deflating via cabin switch too.

Nuovo / New

KIT applicabile su tutte le sospensioni TOP DRIVE SYSTEM (anche già installate) e su sistemi di sospensioni di altri produttori.

KIT suitable for all TOP DRIVE SYSTEM suspensions (already installed too) and for other manufacturers suspensions systems.

E' sconsigliato un utilizzo diverso da quello indicato.

Every other employment is not advisable.

Kit di gonfiaggio Inflating kit

Top Drive System Ref. :

583347 -12V

Kit di trasformazione da manuale a semiautomatico

Permette di trasformare una sospensione integrativa modello "base" (senza compressore), in una sospensione integrativa semi automatica con memoria meccanica della pressione e compressore dedicato. Il sistema consente di mantenere, automaticamente, la pressione delle sospensioni prestabilita, tramite le valvole di regolazione TOP DRIVE CONTROL. E' particolarmente indicato per veicoli con un carico variabile e costante come veicoli commerciali cassonati o furgonati per consegne a breve e lungo raggio e Camper. Permette inoltre lo sgonfiaggio totale e parziale delle sospensioni simultaneamente tramite interruttore in cabina.

Transformation kit from manual to semi-automatic

It allows to transform a "basic" (without compressor) integrative suspension in a semi automatic integrative suspension with mechanical pressure memory and dedicated compressor. This system maintain predetermined pressure set by TOP DRIVE SYSTEM regulation valves automatically. Especially recommended for constant and variable loaded vehicles like flatbed trucks, vans, etc.. for short and long distance deliveries and Camper. Permits simultaneous partial or total suspensions deflating via cabin switch too.

KIT applicabile su tutte le sospensioni TOP DRIVE SYSTEM (anche già installate) e su sistemi di sospensioni di altri produttori.

KIT suitable for all TOP DRIVE SYSTEM suspensions (already installed too) and for other manufacturers suspensions systems.

E' sconsigliato un utilizzo diverso da quello indicato.

Every other employment is not advisable.

**Compressore aria modello:
Air compressor model:**

583203

Top Drive System Ref. :

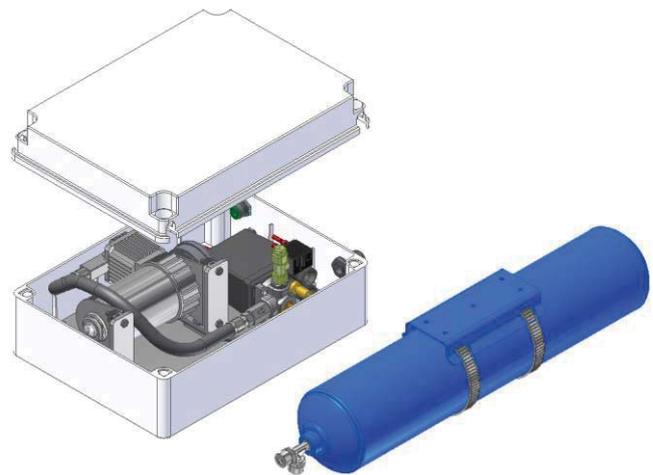

583393 -12V

Kit Gonfiaggio Automatico con sistema VUOTO-CARICO a scarico parziale o totale con compressore 12V DC - Applicazione esterna -

Permette di mantenere, automaticamente, la pressione delle sospensioni prestabilita, tramite le valvole di regolazione TOP DRIVE CONTROL (anche differenziata destra - sinistra). E' particolarmente indicato per veicoli con un carico variabile e costante come veicoli commerciali cassonati o furgonati per consegne a breve e lungo raggio e Camper. Permette inoltre lo sgonfiaggio totale e parziale delle sospensioni simultaneamente tramite interruttore in cabina.

Automatic inflating and EMPTY-LOADED system with partial or total deflating and 12 V DC Air Compressor Kit - External installation -

It allows to maintain predetermined pressure set by TOP DRIVE SYSTEM regulation valves automatically (Even in differentiated regulation between left and right). Especially recommended for constant and variable loaded vehicles like flatbed trucks, vans, etc.. For short and long distance deliveries and Camper. Permits simultaneous partial or total suspensions deflating via cabin switch too.

KIT applicabile su tutte le sospensioni TOP DRIVE SYSTEM (anche già installate) e su sistemi di sospensioni di altri produttori.

KIT suitable for all TOP DRIVE SYSTEM suspensions (already installed too) and for other manufacturers suspensions systems.

E' sconsigliato un utilizzo diverso da quello indicato.

Every other employment is not advisable.

Air compressor model:**

583203

Top Drive System Ref. :

89700010 - 12V

89700014 - 24V Rinforzato / Reinforced

Kit gonfiaggio automatico con sistema scarico differenziato dx/sx
Permette di mantenere, automaticamente, la pressione delle sospensioni prestabilita, tramite le valvole di regolazione TOP DRIVE CONTROL (anche differenziata destra - sinistra). Permette inoltre lo sgonfiaggio indipendente tramite pulsantiera in cabina delle sospensioni (destra e sinistra). E' particolarmente indicato per veicoli con un carico variabile come veicoli cassonati o furgonati per consegne a breve e lungo raggio.

Automatic compressor kit with differentiated deflating (right/left)
It allows to maintain predetermined pressure set by TOP DRIVESYSTEM regulation valves automatically (Even in differentiated regulation between left and right). Permits differentiated suspensions deflating via push-button cabin panel (left and right) too. Especially recommended for variable loaded vehicles like flatbed trucks, vans, etc.. for short and long distance deliveries.

KIT applicabile su tutte le sospensioni TOP DRIVE SYSTEM (anche già installate) e su sistemi di sospensioni di altri produttori.

KIT suitable for all TOP DRIVE SYSTEM suspensions (already installed too) and for other manufacturers suspensions systems

E' sconsigliato un utilizzo diverso da quello indicato.
Every other employment is not advisable.

Top Drive System Ref. :

89700030 - 12V Rinforzato / Reinforced

89700031 - 24V Rinforzato / Reinforced

Kit Gonfiaggio Automatico con sistema carico e scarico differenziato dx/sx con prese aria ausiliarie per GONFIAGGIO PNEUMATICI - Applicazione interna -
Permette di mantenere, automaticamente, la pressione delle sospensioni prestabilita, tramite le valvole di regolazione TOP DRIVE CONTROL (anche differenziata destra - sinistra). Permette inoltre lo sgonfiaggio indipendente tramite pulsantiera in cabina delle sospensioni (destra e sinistra). E' particolarmente indicato per veicoli con un carico variabile come veicoli cassonati o furgonati per consegne a breve e lungo raggio. **Dispone inoltre di presa di carico aggiuntiva per un serbatoio supplementare.**

Automatic compressor kit with differentiated inflating and deflating (right/left) and auxiliary air connections for TIRES INFLATING - Inside installation -
It allows to maintain predetermined pressure set by TOP DRIVESYSTEM regulation valves automatically (Even in differentiated regulation between left and right). Permits differentiated suspensions deflating via push-button cabin panel (left and right) too. Especially recommended for variable loaded vehicles like flatbed trucks, vans, etc.. for short and long distance deliveries. System is also provided by an additional way for extra air reservoir.

KIT applicabile su tutte le sospensioni TOP DRIVE SYSTEM (anche già installate) e su sistemi di sospensioni di altri produttori.

KIT suitable for all TOP DRIVE SYSTEM suspensions (already installed too) and for other manufacturers suspensions systems

E' sconsigliato un utilizzo diverso da quello indicato.
Every other employment is not advisable.

Kit di gonfiaggio Inflating kit

Top Drive System Ref. :

89700280 -12V

89700281 - 12V Con telecomando / With remote control

Compressore 12V DC per gestione indipendente molle ad aria tramite pulsante o telecomando (opzionale)

Unità pompante provvista di valvole per la gestione indipendente in gonfiaggio e sgonfiaggio, di sospensioni pneumatiche. Si adatta ai comandi a cruscotto o ad interruttori, semplice installazione e trasporto.

Independend left/ right air suspension management 12V DC air compressor unit (with optional remote control)

Air compressor unit that for left / right independent air spring management (inflating and deflating). Made for dashboard panel controls or separate switches, easy to install and handle.

KIT applicabile su tutte le sospensioni TOP DRIVE SYSTEM (anche già installate) e su sistemi di sospensioni di altri produttori.

KIT suitable for all TOP DRIVE SYSTEM suspensions (already installed too) and for other manufacturers suspensions systems.

E' sconsigliato un utilizzo diverso da quello indicato.
Every other employment is not advisable.

Top Drive System Ref. :

89700170 -12V

89700171 - 12V Rinforzato / Reinforced

89700180 - 24V Rinforzato / Reinforced

Kit compressore maggiorato in scatola metallica

Unità pompante automatica per esterno provvista di pressostato e scarico automatico della testa. Adatto ad alimentare un serbatoio (fino a 10 l a 7 bar) per utenze generiche.

Reinforced compressor kit with metal box

Air compressor unit for external installation, provided by automatic head release. Useful to fill an external air reservoir (max 10 l at 7 bars) for general purpose use.

Sistema di alimentazione aria multiuso

Multi purpose air feeding system

E' sconsigliato un utilizzo diverso da quello indicato.
Every other employment is not advisable.

Top Drive System Ref. :

583203

Omologato / EU homologation

Compressore aria 12V
12 V Air Compressor
Compresseur a air a 1 voie
12V luftkompressor

Descrizione Description	Unità di misura Measure unit	Valore Value
Tensione nominale di alimentazione Nominal supply voltage	Volt	12V DC
Potenza e assorbimento max Power and max absorption	Watt/Ampere	168 W/14A (7 bar)
Pressione massima Maximum pressure	bar	9 bar
Portata aria aspirata Intake air flow	L/min.	6 L/min (7 bar)
Peso Weight	Kg	1,5 Kg

Sospensioni pneumatiche integrative per
Veicoli Industriali

*Integrative pneumatic suspensions for
Heavy Duty Vehicles*

TIPOLOGIA DELLE SOSPENSIONI

- Sospensione con Torpress Standard
- Sospensione con Torpress maggiorato
- Sospensione con Diapress

Le sospensioni TOP DRIVE SYSTEM sono progettate con una molla ad aria (Torpress) adeguata al tipo di veicolo ed al carico. Nella progettazione la scelta della molla è un fattore determinante. L'esperienza maturata nel tempo conferisce garanzia circa la scelta opportuna.

Per esigenze specifiche può rendersi necessario l'impiego di una molla di taglia diversa dalla comune (normalmente maggiore) in quanto l'uso particolare del mezzo è fuori dagli standard d'uso.

La differenziazione e la specializzazione dei veicoli verificatasi negli ultimi anni, ha indotto i nostri tecnici all'uso di soluzioni diverse ma non meno efficaci da quelle tradizionali. Ecco che per i veicoli industriali è stato impiegato, ove possibile, il Diapress in luogo del Torpress. La tecnologia Diapress è da tempo consolidata sui rimorchi, bus e veicoli da trasporto, perché offre una escursione decisamente superiore rispetto al tradizionale Torpress. Il Diapress però non è sempre impiegabile: necessita di maggior spazio di lavoro e la membrana è più sottile, quindi più delicata rispetto al Torpress. Queste limitazioni non ne consentono l'uso in tutti le applicazioni.

TIPOLOGIA DI GONFIAGGIO

Per i veicoli industriali i kit di sospensione pneumatica TOP DRIVE SYSTEM possono essere forniti con diverse modalità di gestione della pressione (o gonfiaggio):

- Gonfiaggio automatico o autolivellante
- Gonfiaggio elettrico con pulsante in cabina (carico - scarico)
- Gonfiaggio misto: autolivellante con selettore per gonfiaggio elettrico in cabina
- Gonfiaggio con telecomando: analogo al gonfiaggio elettrico ma con comando wireless, con interruttore sul cruscotto opzionale

COMANDO AUTOLIVELLANTE.

E' il comando più adatto per il trasporto su lungo raggio.

Garantisce un buon comfort e tenuta di strada in curva, assicurata da un ritardo di intervento gestito tramite le valvole autolivellanti.

L'installazione è semplice, previa taratura iniziale (modificabile solo in officina) il sistema gestisce autonomamente la pressione delle singole molle ad aria.

COMANDO ELETTRICO

Il comando elettrico consente la gestione della pressione delle sospensioni tramite un pulsante ed un manometro posizionati in cabina.

Suggerito ove si prevedano frequenti aggiustamenti di carico, non facilmente gestibili in modo automatico. In particolar modo indicato per trasporti a medio raggio e su percorsi misti (frequenti spostamenti fra strade, autostrade, cantieri).

Il sistema così concepito offre una grande flessibilità di regolazione, migliorando il comfort e sollevando il mezzo, tramite la pressione di un semplice tasto, scongiurando il contatto degli organi del veicolo con il suolo in caso di strade accidentate.

COMANDO ELETTRICO TRAMITE TELECOMANDO.

Il controllo tramite telecomando è analogo a quello elettrico. Il tipo di regolazione è sempre eseguita a discrezione del conducente, ma con la praticità di un telecomando wireless, in modo da poter controllare anche dall'esterno l'assetto del veicolo.

AUTOMATICO CON COMANDO ELETTRICO

Il kit automatico con comando elettrico offre la massima libertà d'azione.

Con un semplice interruttore è possibile passare dalla modalità automatica a quella manuale e quindi regolare il sistema in base alle condizioni della strada e alla sensazione del conducente.

E' poi possibile ritornare al funzionamento automatico in qualunque momento.

Il sistema è particolarmente indicato per i clienti più esigenti che in qualunque condizione non vogliono rinunciare alla gestione automatica sul lungo raggio ed alla gestione manuale su terreni accidentati come cantieri o strade non asfaltate.

NOTE GENERALI.

Il sistema TOP DRIVE SYSTEM per veicoli industriali è principalmente applicato sull'asse anteriore, permettendo di aumentare la distanza del paraurti dal suolo, evitando così urti che possano danneggiare il veicolo. Inoltre aumenta notevolmente il comfort di guida.

E' importante notare che con il sistema TOP DRIVE SYSTEM i costi di manutenzione del veicolo non vengono ad aumentare. Inoltre si limitano i costi di intervento dovuti alla scocca solitamente troppo bassa. Il vantaggio principale rispetto all'impiego di una balestra supplementare risiede nel fatto che la stessa ha una rigidità predeterminata, dipendente dal materiale e dalla geometria del componente, mentre la molla ad aria ha una rigidità entro certi limiti gestibile dal conducente o dall'installatore.

TOP DRIVE SYSTEM

Suspension choice indications

SUSPENSION TYPES

Standard Torpress
Increased size Torpress
Standard Diapress

TOP DRIVE SYSTEM suspensions are designed equipped with the right air spring (Torpress) suitable for different type of vehicle and load. In the design stage the choice is a decisive factor and comes from our experience gained during all these years of activity. For specific requirement the use of an increased air spring can be necessary, due to the particular usage of vehicle.

Vehicle difference and specialization happened during last years, lead our technicians to different solutions but not less effective than the traditional ones.

For industrial heavy vehicles the Diapress is utilized instead of Torpress when possible. The Diapress technology is widely used on trailers, bus and transport vehicles due to it's superior excursion compared to the Torpress.

Diapress cannot be used in every situation: the working room needed is bigger compared to the Torpress and the membrane is less thicker and more fragile. These limitations avoid the Diapress use in every situation.

INFLATING TYPES

TOP DRIVE SYSTEM integrative suspension kit can be provided with different kind of pressure (inflating) management:

- Automatic or self-levelling inflating
- Electric inflating activated via cabin switch (empty - loaded)
- Mixed: self-levelling with electric inflating cabin switch
- Remote controlled: same as electric inflating but activated via remote control and an optional cabin switch

SELF-LEVELLING INFLATING

Well-suited for long range transports.

Provide good comfort and safe road turn reaction, by self-levelling valves delayed attuation.

Easy installation: this system self manages individually air spring pressure upon initial calibration (adjustable in workshop only).

ELECTRIC INFLATING

Allows air suspension pressure management via cabin switch and pressure gauge.

Suggested where variable loads often occur, for medium range transports and mixed tracks (frequent switch between roads, highways and construction sites).

This system has a great regulation flexibility, the pressure is controlled via cabin switch and the vehicle can be lowered and lifted up depending on the situation.

REMOTE CONTROLLED INFLATING

Same for electric inflating. Pressure regulation is controlled by the user with a remote control. It can be used especially to keep the load balanced, even outside the cabin.

SELF-LEVELLING WITH ELECTRIC INFLATING SWITCH

Allows maximum range of pressure management.

With a simple switch is possible turn off the automatic management and calibrate manually the desired pressure.

This system is suggested for the most demanding customers that in every condition can choose the right pressure management. The suspensions can be self-controlled during long range runs and manually adjusted in any situation like bumpy roads, off-roads or construction sites.

GENERAL NOTES

TOP DRIVE SYSTEM integrative suspension for industrial vehicles is primarily (but not only) for the front axle. Increases the distance between body frame (cabin) and road, avoids accidental damages due to the lowering of a loaded vehicle and increases driving comfort.

Maintenance fees don't rise up with a TOP DRIVE SYSTEM installation, and chances for unwanted body frame damages are extremely reduced.

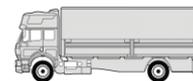

TOP DRIVE SYSTEM main advantage compared with a supplementary leaf spring, is that the air spring stiffness can be controlled by the user. On the contrary the predetermined leaf spring material stiffness cannot be changed.

Ricambi e accessori per sospensioni
pneumatiche integrative

*Spare parts and accessories for integrative
pneumatic suspensions*

Ricambi e accessori per veicoli industriali
Spare parts and accessories for industrial vehicles

Top Drive System Ref. :
583326

Kit valvole livellatrici

Self levelling valves kit

Kit de vannes autonivelante

Top Drive System Ref. :
583294

Valvola autolivellante comando gonfiaggio/sgonfiaggio adattabile sospensioni pneumatiche integrative

Self levelling valve for inflating/deflating command, adaptable at integrative air spring

Vanne autonivellement commande gonflement/degonflement pour adaptation suspensions pneumatiques integratives

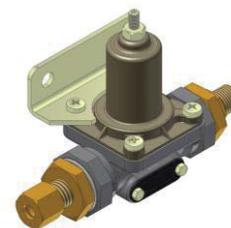

Top Drive System Ref. :
583255

Valvola a pressione controllata 8,2 bar adattabile sospensioni pneumatiche integrative

Pressure controlled valve (8,2 bar) adaptable integrative pneumatic suspension

Valve a pression controllee 8,2 bars pour adaptation suspensions pneumatiques integratives

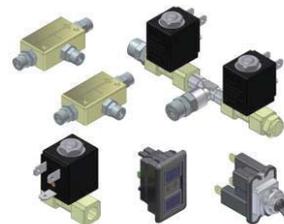

Top Drive System Ref. :
89800030

Kit adattamento da gonfiaggio autolivellante a gonfiaggio manuale con comando elettrico per sospensioni posteriori

Self levelling inflating - manual inflating adapter kit (with electric command), for rear suspensions

Kit pour la conversion de gonflement autoniveleur à gonflement manuel avec commande électrique pour suspensions arrière.

Top Drive System Ref. :
89800040

Kit adattamento da gonfiaggio autolivellante a gonfiaggio manuale con comando elettrico per sospensioni anteriori

Self levelling inflating - manual inflating adapter kit (with electric command), for front suspensions

Kit pour la conversion de gonflement autoniveleur à gonflement manuel avec commande électrique pour suspensions avant.

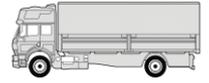

Top Drive System Ref. :
89800041

Kit adattamento da gonfiaggio autolivellante a gonfiaggio manuale (solo scarico)

Self levelling inflating - manual inflating adapter kit (only deflation)

Kit pour la conversion de gonflement autoniveleur à gonflement manuel (seulement dégonflage).

**Top Drive System Ref. :
583425**

Kit adattamento da gonfiaggio elettrico a gonfiaggio con telecomando per sospensioni posteriori

Electric inflating to remote command inflating adapter kit for rear suspensions

Kit pour la conversion de gonflement autoniveleur à gonflement manuel avec commande électrique pour suspensions avant.

**Top Drive System Ref. :
583426**

Kit adattamento da gonfiaggio elettrico a gonfiaggio con telecomando per sospensioni anteriori

Electric inflating to remote command inflating adapter kit for front suspensions

Kit pour la conversion de gonflement autoniveleur à gonflement manuel avec commande électrique pour suspensions avant.

**Top Drive System Ref. :
89800050**

Comando elettrico 24 V per gonfiaggio - sgonfiaggio sospensioni pneumatiche integrative con telecomando

24 V electric inflating-deflating integrative pneumatic suspension control with remote control

Commande électrique 24 V pour gonflement - degonflement suspensions pneumatiques intégratives avec télécommande

Nuovo / New

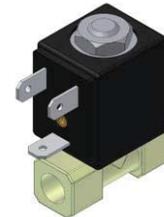

**Top Drive System Ref. :
583244**

Elettrovalvola a 2 vie 24 V c.c. (n.c.) comando sospensioni pneumatiche attacco 1/8" gas

2 ways solenoid valve 24 V DC pneumatic suspension control (1/8" gas fixing)

Electrovanne a 2 voies 24 V c.c. (re) commande suspensions pneumatiques fixation 1/8" gaz

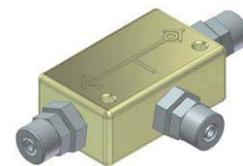

**Top Drive System Ref. :
583297**

Valvola deviatrice per sospensione pneumatica anteriore completa di raccordi 1/8" gas per tubo Ø8x6

Three ways valve for rear pneumatic suspension with pipe fittings 1/8" gas Ø8x6

Papillon déviateur pour suspension pneumatique avant complète de raccords 1/8" gaz, tube Ø8x6.

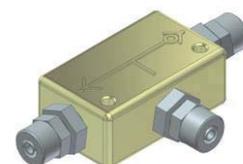

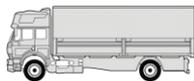

**Top Drive System Ref. :
583296**

Valvola deviatrice per sospensione pneumatica posteriore completa di raccordi 1/8" gas per tubo Ø6x4 - Ø8x6

Three ways valve for rear pneumatic suspension with pipe fittings 1/8" gas Ø6x4 - Ø8x6

Papillon déviateur pour suspension pneumatique arrière complète de raccords 1/8" gaz, tube Ø6x4 et Ø8x6.

Ricambi e accessori per veicoli industriali
Spare parts and accessories for industrial vehicles

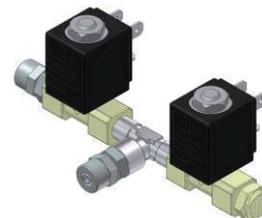

**Top Drive System Ref. :
583245**

Comando elettrico 24 V per gonfiaggio - sgonfiaggio sospensioni pneumatiche integrative

24 V electric inflating-deflating integrative pneumatic suspension control

Commande électrique 24 V pour gonflement - degonflement suspensions pneumatiques intégratives

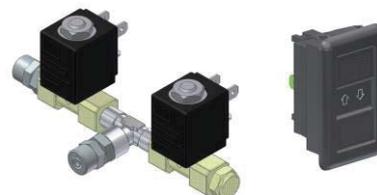

**Top Drive System Ref. :
89800020**

Comando elettrico 24 V per gonf. / sgonf. Sospensioni pneumatiche integrative con interruttore generico

24 V electric inflating / deflating integrative pneumatic suspension control with generic switch

Commande électrique 24 V pour gonfl. / degonfl. Suspensions pneumatiques intégratives avec commutateur génériques

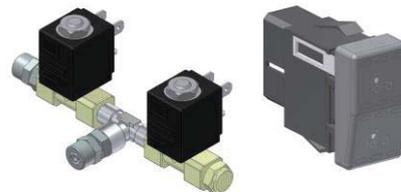

**Top Drive System Ref. :
89800021**

Comando elettrico 24 V per gonf. / sgonf. Sospensioni pneumatiche integrative con interruttore IVECO Eurocargo / Eurotech

24 V electric inflating / deflating integrative pneumatic suspension control with IVECO Eurocargo / Eurotech switch

Commande électrique 24 V pour gonfl. / degonfl. suspensions pneumatiques intégratives avec commutateur IVECO Eurocargo / Eurotech

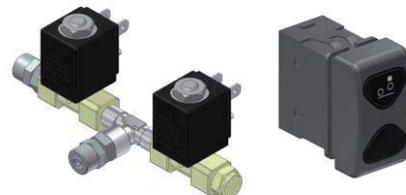

**Top Drive System Ref. :
89800022**

Comando elettrico 24 V per gonf. / sgonf. Sospensioni pneumatiche integrative con interruttore IVECO Eurocargo Restyling / Stralis

24 V electric inflating / deflating integrative pneumatic suspension control with IVECO Eurocargo Restyling / Stralis switch

Commande électrique 24 V pour gonfl. / degonfl. suspensions pneumatiques intégratives avec commutateur IVECO Eurocargo Restyling / Stralis

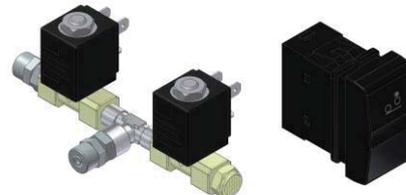

**Top Drive System Ref. :
89800023**

Comando elettrico 24 V per gonf. / sgonf. Sospensioni pneumatiche integrative con interruttore IVECO Eurocargo Restyling / Stralis MY 2014

24 V electric inflating / deflating integrative pneumatic suspension control with IVECO Eurocargo Restyling / Stralis MY 2014 switch

Commande électrique 24 V pour gonfl. / degonfl. suspensions pneumatiques intégratives avec commutateur IVECO Eurocargo Restyling / Stralis MY 2014

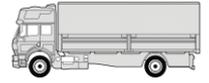

**Top Drive System Ref. :
89800010**

Kit comando elettrico 24V per gonf./sgonf. Sospensioni pneumatiche integrative (impianto sdoppiato)

24 V electric inflating / deflating integrative pneumatic suspension differentiated control (right/left)

Commande électrique 24 V pour gonfl. / degonfl. Suspensions pneumatiques intégratives (double système)

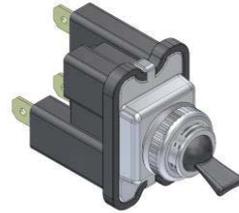

Top Drive System Ref. :
583268

Interruttore comando elettrico 3 poli

Electric system switch (3 poles)

Interrupteur commande électrique 3 pôles

Top Drive System Ref. :
583291

Interruttore comando elettrico generico

Generic electric system switch

Interrupteur commande generique

Top Drive System Ref. :
583299

Interruttore comando elettrico IVECO Eurocargo, Eurotech, Eurostar

Electric command switch IVECO Eurocargo, Eurotech, Eurostar

Interrupteur commande électrique IVECO Eurocargo, Eurotech, Eurostar

Top Drive System Ref. :
583298

Interruttore comando elettrico IVECO Stralis e Eurocargo Restyling

Electric command switch IVECO Stralis and Eurocargo Restyling

Interrupteur commande électrique IVECO Stralis et Eurocargo Restyling

Top Drive System Ref. :
583411

Interruttore comando elettrico IVECO Stralis e Eurocargo Restyling MY 2014

Electric command switch IVECO Stralis and Eurocargo Restyling MY 2014

Interrupteur commande électrique IVECO Stralis et Eurocargo Restyling MY 2014

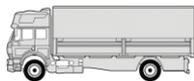

Top Drive System Ref. :
583223

Manometro Ø 52 illuminato 24 V attacco posteriore

Manometer Ø 52 mm lightened 24 V rear fixing

Manometre Ø 52 eclaire 24 V fixation arriere

Ricambi e accessori per veicoli industriali
Spare parts and accessories for industrial vehicles

Top Drive System Ref. :
583239

Valvola di controllo a due vie

Two ways control valve

Valve de controle a deux voies
