Approved Oils MACK Components

Approved Oils, Mack Components

This service bulletin identifies the oil requirements and lists the companies offering oil types and qualities required for MACK components.

Note: Failure to follow these recommendations may void any and all applicable engine, transmission and drive line warranties.

Contents

- “Approved Oils, MACK Engines”, page 2
- “Approved Oils, MACK mDRIVE Transmissions”, page 13
- “Approved Oils, MACK Transmissions”, page 13
- “Approved Oils, MACK Components”, page 16

Approved Oils, MACK Engines

Engine Oil Type/Quality

See the engine types for recommended oil change intervals. The intervals do not cover all applications. In on/off highway driving, severe off-highway, continuous stop-and-go city driving and extremely high mileages, the oil change interval needs to be customized for the best protection and economy. Change all oil filters at each oil change.

Synthetic oils do not allow further extension of oil drain intervals. It is the contamination rate (i.e., soot and the depletion of additives) rather than base oil quality that determines the useful engine oil life and therefore the oil change intervals.

Note: Engines meeting the 2007 and later emissions requirements are designed with exhaust aftertreatment systems requiring a new engine oil quality. This has lead MACK to require an oil that meets MACK EO-O Premium Plus quality standards for model year 2007 and later MACK engines. The MACK EO-O Premium Plus quality standard is based on the newly developed API CJ-4 engine oil specification, but has additional performance requirements essential to adequately protect the MACK engines at the drain intervals specified. So, all oils listed in this bulletin also meet the API CJ-4 specification. Pre-2007 engines also work better with the above mentioned oils, but are not required.

CAUTION

Extra oil additives must never be added to any oil used.

MACK EO-O Premium Plus Approved Engine Oils

Note: All the oils listed in the following table meet the VDS-4 standard. They also meet VDS-2, VDS-3, EO-N Premium Plus and API CJ-4 quality standards. Oil from this list is **REQUIRED** for model year 2007 and later MACK engines and are recommended for earlier engines.

Supplier	Brand Name	Viscosity Grade

Approved Oils, MACK *m*DRIVE Transmissions

Transmission Oil Type/Quality

CAUTION

Only use MACK-approved synthetic transmission oil in the *m*DRIVE transmission. Using non-approved transmission oil can result in damage to transmission components.

CAUTION

Drained *m*DRIVE synthetic oil must NEVER BE REUSED and must be replaced along with the transmission oil filter when the transmission oil is changed.

MACK *m*DRIVE transmissions are factory filled with Castrol Syntrans SAE 75W-85 synthetic oil. Castrol Syntrans SAE 75W-85 synthetic oil is approved for extended oil drain intervals in *m*DRIVE transmissions.

ExxonMobil 97307 spec synthetic oil is also approved for use in the *m*DRIVE transmissions. The ExxonMobil 97307 spec oil is fully compatible for top off, etc. with the Castrol Syntrans 75W-85 factory fill oil and provides the regular oil drain interval in all *m*DRIVE transmissions.

Approved Oils, MACK Transmissions

Transmission Oil Type/Quality

CAUTION

Only use MACK-approved transmission oil in the Mack transmissions. Using non-approved transmission oil can result in damage to transmission components.

TO-A Plus Approved Oils

TO-A Plus Approved Oils are for use in Mack (non-mDrive) transmissions only. These oils are extended life lubricants. These oils are approved as of October 14, 2010.

Approved Oils, MACK Components

CAUTION

Only use MACK-approved oil in Mack components.
Using non-approved oil can result in damage to Mack components.

GO-J Approved Oils

GO-J approved oils are for use in MACK carriers, MACK transfer cases and MACK (non-mDRIVE) transmissions.
These oils were approved as of March 11, 2003.
