Item:
Restricted approval of lubricant - Q8 "Mahler G4"

Dear Mr. Hensen,

the lube oil mentioned above is not listed in the current technical circular for MWM gas engine lube oils, because the field trials are not finished until now.
After successful field trials over many hours and monitoring of the oil condition, MWM GmbH allows to increase the number of plants up to 20 with this new product.

Due to the experiences from the field trial, we don't expect any problems with

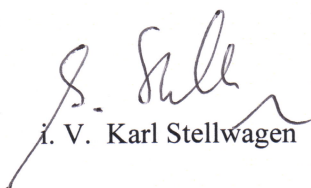

Q8 "Mahler G4", SAE40

MWM GmbH has to be informed about the plants which are operated with this lube oil.

Furthermore the requirements of our technical circular TR 0199-99-2105 and the technical product information TPI 1111-08-01 have to be followed.

Kind Regards

MWM GmbH

i. V. Karl Stellwagen
