Subject: Kuwait Petroleum Marine Engine Oil Q8 MOZART MS

Dear Sir,

Referring to your above mentioned letter we can confirm that the analytical characteristics of Kuwait Petroleum Marine Engine Oil Q8 Mozart MS, as submitted by you in the letter, are in line with the general requirements for engine oils recommended for application in Sulzer medium speed trunk piston engines.

Practical experience with this in Sulzer ZA40 engines under field conditions, however, is not available here.

Considering the laboratory data, we have no objections against using Q8 Mozart MS tentatively in a Z40 engine operating on heavy fuel oil. Application has to be in line with Sulzer Diesel lubricating oil requirements.

We want to point out, however, that application of oils with 40 TBN alkalinity is recommended if the sulfur content of the fuel is higher than 2.5 percent, as outlined in our lubricating oil requirements for Z40 engines.

Yours sincerely,

MBS Diesel Engines Limited
