SUBJECT : Engine oil Q8 Mahler MA 40

cf

Thank you for your Fax WS 96-53tfx/hn on 05-03-96.

I do confirm the receipt of your letter and video tapes as well as photos, and thank you very much for it.

As far as customer Alfred Pedersen at Bellinge is concerned, your engine oil Q8 Mahler MA 40 shows good performance during fast 6-8,000hours, and there is no objection to use the oil on this specific customer.

Also there is another customer who currently use Q8 Mahler MA40 and no negative information has been sent so far.

These facts mean that Q8Mahler MA40 is considered to be a candidate of recommended lubricant for our gas engine 26HX-G.

We are now in the course of revision of our recommendation list of lub oil, which is made every about 1-1.5 year. So please wait a little more weeks to finish our work. If there is anything to ask you to improve, for example, we will inform you later.

Best regards,

Y. Itoh
