Cross Green Industrial Estate,
Leeds.
LS9 0NP.

Our Ref: DH/MKW/844

27th September 1993.

For the attention of Mr. M. Phillips -
Technical Sales Adviser.

Dear Sirs,

We would refer to your letter dated 2nd September 1993 concerning the possibility of including Q8 lubricants on our recommended lubricants chart.

Please find enclosed, for your records, a revised copy of the chart with your products included.

This chart will form part of our operator/maintenance manuals that are produced for every special purpose machine built by Pollard.

With regard to the second list, this is mainly for internal use and for reference when discussing Pollard standard machines, the range of which has reduced considerably over recent years, and is now referred to when discussing spares, re-builds and secondhand machines.

Consequently, your products have been included, but the list will not be issued to customers.

We trust the above and enclosed is satisfactory and if we can be of any further assistance, please contact us once again.

Yours faithfully,

A handwritten signature in cursive script, reading "David Hurst".

David Hurst.
Technical Sales Administrator.
