Approval Q8 Mozart KV SAE 40

Dear Mr. Hensen,

The results, obtained during the test run onboard the ship „Stroemfjord“ in our 9 M 32 engine operating on distillate fuels are positiv. So we are able to grant approval I status for the luboil Q8 Mozart KV SAE 40 to be used in all distillate operated MaK / CM engines.

Please take into account that this approval is only valid as long as the formulation remains unchanged.

Best Regards
Caterpillar Motoren GmbH & Co, KG
